I am happy with the content of the course, like the case-based approach. The teacher is energetic and explains the material well.
The real-life focus of the teaching.
I liked that the course didn't focus on classic theory and models but rather on challenging the norms, finding the caveats in existing models and suggesting ways to overcome them.

This teacher puts in effort to prepare his lecture slides (they are pretty well prepared and comprehensive). His lectures are fairly interesting and engaging. Also, he is generally quite effective in facilitating discussion during seminars.
He has a good content for his lectures and is always well prepared. His explanations are very clear.
- his lecturing style was fuelling interest in the subject - he was able to answer any question and always had a good example to support the argument - he challenged us in problem classes to think further -> he nurtured interest in the subject

The lectures were conducted well and the class discussions were highly interactive with inputs and insights being shared.		
The lecture notes are precise and the content is really interesting.		
I learned so much in MN404. The professor presented the subject matter very clearly. The structure was great and I felt the professor paid attention to the audience, and as such not just lecturing, but actually engaging the class. Out of all my courses this has been the one where I learned most.		
He was direct and very extraverted - helped us see the meaning of the context. He was passionate about teaching.		
A very good teacher with a humorous approach. Kept the class interesting and lively.		
he was enthusiastic, energetic and had a wonderful way of simplifying explanations of more complex issues into clearly understandable and memorable language.		
Subject matter was very interesting and it was taught very well. The seminars in particular were very interesting and useful.		
One of the best taught courses. The content is extremely interesting and useful. The professor is excellent in conveying knowledge and inducing thought. Classes were very successful.		
The interactive seminars.		
The course materials were very well developed and included everything that was needed. The lecture slides were also well organized and the lectures were very clearly presented. It was great that we had a new case every week so that we got to know different examples for each piece of theory and didn't get bored.		
There was a good pace in the course, the teacher could present difficult topics in an understandable way, omitting confusing details.		
Teaching skill. Was very easy to understand. Good environment in class.		
He's very enthusiastic and he could elaborate how the theories or academic ideas are applied in real life. He's encouraging everyone to speak up.
