Children's secondary care services
Primary care services
Children's tertiary care services
Horizontal Network
Health services
Social services
Education services

*Includes neonatal services and CAMHS

Agree Decision Areas
Park less central ones
Defer location questions
Must inpatient units co-locate with neo-natal intensive care units?
Use of SCA option graph answers 'no'.
Series of side discussions to fix problem boundaries

Specify Ambulatory Centres
Reaffirm focus:
- no. of in/p units
- no. of ambulatory centres
- level of community provision increase
Identify constraints limiting combinations
Use SCA option tree to identify 4 feasible patterns of provision

Discuss implications for other hospital depts.
Agree criteria for choosing between patterns
Use of SCA "comparative advantage" chart produces agreement on(1,1, Large)
Agree criteria for location choices
Use of SCA option graph areas plus confidential vote on agreed choices
Revisit parked areas

Select participants
Inputs from consultation process
