Short Summary of Some Herding Literature
[Thanks to Melania Nica & Francesco Palazzo for helping with the selection!]

Exogenous timing: players move in a particular order

Herding with endogenous timing of decision:

Asset prices and herd behavior:
- “Financial crises as herds: overturning the critiques” Chari and Kehoe, JET 2006 (with endogenous timing)
- “Herding with Asymmetric Information about Traders Types”, Testa, working paper 2009.

Monopoly prices and herd behavior
- “Monopoly pricing in the binary herding model” Bose, Orosel, Ottaviani & Vesterlund, ET 2008.

Herding and Reputation:
- “Herd Behavior and Investment: Comment”, Ottaviani & Sørensen, AER 2000 (links Scharfstein & Stein’s paper to the classical paper by Bikhchandani, Hirshleifer & Welch 1992)

Testing the models/ Experimental economics
- "Do we follow others when we should? A simple test of rational expectations", Weisacker, AER 2010. (test on Bickchandani, Hirshleifer & Welch 1992)

In colors are papers already scheduled to be presented.
